**Abbreviations:** DTaP = diphtheria and tetanus toxoids and acellular pertussis vaccine; MMR = measles, mumps, and rubella vaccine; NR = not reported; Nreq = not required for school entry; Polio = poliovirus vaccine; NA = not available; pub. = public; pvt. = private; VAR = varicella; vol. = voluntary.

\*Estimates are adjusted for nonresponse and weighted for sampling where appropriate. Estimates based on a completed vaccine series (i.e., not vaccine-specific) use the “≥” symbol. In Kentucky, public schools reported numbers of children up-to-date with specific vaccines while most private schools reported numbers of children who received all doses of all vaccines required for school entry. Coverage might include history of disease or laboratory evidence of immunity.

†Includes five territories and three freely associated states.

§The kindergarten population is an approximation provided by each program.

†Sample designs varied by state/area: census = program attempted to include all schools (public and private), and all children within schools in the assessment, and had a student response rate of ≥90%; 1-stage or 2-stage cluster sample = schools were randomly selected, and all children in the selected schools were assessed (1-stage) or a random sample of children within the schools was selected (2-stage); voluntary response = a census with a student response rate of <90% (does not imply that participation was optional).

\*\*Some programs publish kindergarten vaccination data online that are more detailed than the state-level estimates in this table. Examples of more detailed data include county, parish, school district, and school-level estimates.

††Most states require 2 doses of MMR; Alaska, New Jersey, and Oregon require 2 doses of measles, 1 dose of mumps, and 1 dose of rubella vaccines. Georgia, New York, New York City, North Carolina, and Virginia require 2 doses of measles and mumps, 1 dose of rubella vaccines. Iowa requires 2 doses of measles and 2 doses of rubella vaccines.

§§Pertussis vaccination coverage might include some diphtheria and tetanus toxoids, and pertussis vaccine (DTP) vaccinations if administered in another country or by a vaccine provider who continued to use DTP after 2000. Most states require 5 doses of

DTaP for school entry, or 4 doses if the fourth dose was received on or after the fourth birthday; Maryland and Wisconsin require 4 doses; Nebraska requires 3 doses. The reported coverage estimates represent the percentage of kindergartners with the state-required number of DTaP doses, except for Kentucky, which requires  $\geq 5$  but reports  $\geq 4$  doses of DTaP.

<sup>¶¶</sup> Most states require 4 doses of Polio for school entry, or 3 doses if the fourth dose was received on or after the fourth birthday; Maryland and Nebraska require 3 doses. The reported coverage estimates represent the percentage of kindergartners with the state-required number of Polio doses, except for Kentucky, which requires  $\geq 4$  but reports  $\geq 3$  doses of Polio.

<sup>\*\*\*</sup> Reporting of varicella vaccination status for kindergartners with a history of varicella disease varied within and among states; some were reported as vaccinated against varicella and others as medically exempt.

<sup>†††</sup> National estimates and medians calculated from data from 49 states and the District of Columbia (i.e., does not include Montana, Houston, New York City, American Samoa, Guam, Marshall Islands, Federated States of Micronesia, N. Mariana Islands, Palau, Puerto Rico, or U.S. Virgin Islands). Data reported represent 3,837,259 kindergartners.

<sup>§§§</sup> The proportion surveyed is reported as 100%, but might be  $<100\%$ , but if based on incomplete information about the actual current enrollment.

<sup>¶¶¶</sup> Counted some or all vaccine doses received regardless of Advisory Committee on Immunization Practices recommended age and time interval; vaccination coverage rates reported might be higher than those for valid doses.

<sup>\*\*\*\*</sup> Did not include certain types of schools, such as kindergartens in child care facilities, online schools, correctional facilities, or those located on military bases or tribal lands.

<sup>††††</sup> Kindergarten vaccination coverage data were collected from a sample, and exemption data were collected from a census of kindergartners.
